OVERVIEW

Driven and dedicated professional with a passion for analytics and a commitment to helping individuals and organizations solve complex problems. Possessing a diverse skill set and a strong ability to adapt, my expertise includes:

- **Motivated:** Devotion to completing all tasks to the best of his abilities
- **Forward-looking:** Passionate about removing repetition by using automation
- **Observant:** Ability to bring a different perspective to the job at hand
- **Software:** Python, Spark, SQL, Databricks, Azure, MLflow, Airflow, R, LLMs, and Power BI
- **Certifications:** SAS Certified Base Programmer for SAS 9,
SAS Certified Statistical Business Analyst Using SAS 9,
Google Analytics Individual Qualification

EDUCATION

Master of Science in Analytics

May 2019

Institute for Advanced Analytics, North Carolina State University, Raleigh, NC

Bachelor of Science in Mathematics, *magna cum laude*

December 2017

Campbell University, Buies Creek, NC

PROFESSIONAL EXPERIENCE

Sonic Automotive - EchoPark, Charlotte, NC

Data Scientist

August 2024 – Present

- Developed and productionized machine learning models, including tire replacement prediction based on tread depth and consumer interest scoring models leveraging website data and price ranking
- Built and maintained Airflow DAGs to automate weekly reporting, orchestrate ETL pipelines, and retrain and refresh machine learning models
- Wrote a production API that identifies markets for vehicles based on sales trends and current inventory, leveraged to streamline the decision-making process

Dentsply Sirona, Charlotte, NC

Data Scientist

October 2020 – July 2024

- Led end-to-end development and deployment of machine learning models and forecasts, including initial discovery, parameter tuning, and execution of model registry and deployment using MLflow
- Built Customer Lifetime Value (CLV) models to forecast customer spending across multiple business lines, achieving an average prediction error of ~5%
- Utilized the Azure ecosystem to design, implement, and monitor various batch pipelines, leveraging tools such as Azure Data Factory, Azure Databricks, and Azure Monitor
- Created an in-house Python module to streamline machine learning and automation tasks, enhancing efficiency across all data science and automation teams within the organization
- Built geospatial models using Apache Sedona to create optimized sales territories, improving rep coverage and route efficiency
- Implemented various customer segmentation models across multiple lines of business to find unique customer groups and their defining attributes

Synechron, Charlotte, NC

Senior Consultant

June 2019 – September 2020

- Served as a project manager overseeing the soundness and security of servers for applications used by 20,000+ customers for a large financial institution
- Developed various natural language processing (NLP) classification models for a proof of concept presented to a large financial institution
- Authored documentation for industry-leading solutions, explaining complex data science tasks for non-technical audiences

PROJECTS

Putnam Investments Practicum Project

September 2018 – April 2019

- Created a predictive dashboard that recommends which financial advisors have the most potential and how Putnam should engage with that particular financial advisor
